Now, having trouble at the delayed engagement of the transmission. There is another knit filter on the right side that does the direction. If someone has, please share with me. I am trying to replace all the oil and hydraulic transmission fluid etc. KUBOTA L1500, JD 410 Backhoe, MF 30 Tractor, IH TD14 142, BCS 715 Low Low Oleo. Thanks for your Ni Wolfman response. In fact, I was making a growling sound whenever you push the pedal on each side before I have it. It works well and no oil leaks any points. Kubota L1500, JD 410 Backhoe, MF 30 Tractor, IH TD14 142, BCS 715 Tiller North Idaho Wolfman said: Check out this. It's best done with Tranny Drained. I could not find this piece of piece in the pieces book. I knew the left mesh filter for transmission, but filter right to the direction of energy. It will update once all the oil, changed fluid too, I am wondering how to buy the HST cover. Transmission selector is not fully involved. You can not bleed them and you do not need anyway. anyway.
